Privacy Enhanced Gateway version 3.3.16 Release Notes

Review the new features and fixes available in this release.

Release Date: 5-Sep-2023

For information related to features and fixes in previous Privacy Enhanced Gateway releases, see the PDFs for these releases: [Process Discovery documentation \(release versions\)](#).

What's new

View status of all the events

Review the status of all the events such as completed, pending or failed. In addition, you can also track specific reason for failure of each event when being transmitted to the Process Discovery platform from PEG.

[Manage PEG events](#)

Regex to filter redaction results

Use the real-time redaction review to assess and setup redaction configurations based on regular expressions.

[Review redaction results](#)

Export PEG metrics

As part of managing the redaction configurations, click the **Export PEG Metrics** button to export and download PEG metrics.

Fix

Fix

OCR is now enhanced for mainframe applications to address poor detection results. The updated Deduction model that is available with this release is better at detection results, specifically in the Mainframe applications.
