Process Discovery version 1.76.0 release notes

Review the new features and fixes available in this release.

Release Date: [29-August-2023](#)

For information related to features and fixes in previous Process Discovery releases, see the PDFs for these releases: [Process Discovery documentation \(release versions\)](#).

Note: Version 1.75.0 is an internal-only release.

What's new

Flow Graph is set to default mining type

The Flow Graph is the default mining type when you run a basic or an advanced mining run.

[Create a Mining Run](#)

Recommended and Highly Recommended processes

Mining runs with Flow Graph Process results are now tagged as **Recommended** and **Highly Recommended** where applicable to help you determine which processes to focus on for optimization.

What's changed

Flow Graph Enhancements

The following enhancements are added to Flow Graph:

- The Start and end nodes are labeled
- Frequency counts are added to the start/end nodes and start/end connections.
- All the Flow Graphs are now accessible under **Visualizations**.
