Process Discovery version 1.78.0 release notes

Review the new features and fixes available in this release.

Release Date: 17-October-2023

For information related to features and fixes in previous Process Discovery releases, see the PDFs for these releases: Process Discovery documentation (release versions).

> ❶ **Note:** Version 1.77.0 is an internal-only release.

Fixes

Kibana and Platform Activity Log Sync

Fix for an out-of-sync issue with the activity logs between Kibana and the Platform.

Path and Flow Graph Duration Discrepancy

Fix for an issue showing different durations between Path and Flow graph for the same events.

Increase Event Viewer Limit to 3000 Events

Fix to increase the Instance Viewer limit to 3000 events.

Provisional Signature Viewing Issue Fix

Fix for issue restricting provisional signature viewing beyond the 56th image.

Provisional Signature Refresh Improvement

Provisional signatures will now refresh with the latest signatures when a new provisional signature job completes.
